CONTROL EVERYTHING

A Smart Manager

TIS CABLE MANAGER

Properly distributing cables in electrical boxes for big projects can be frustrating, but when there are enormous volumes of wires, it is better to have them organized.

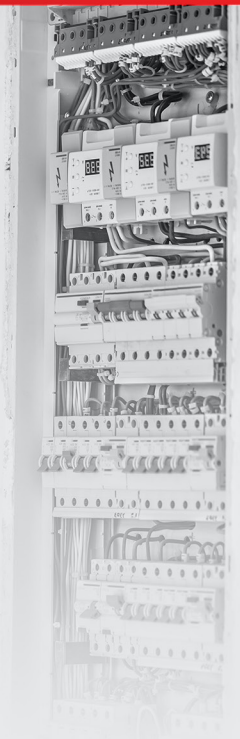

Cable Manager is TIS's din rail module for mounting in the electrical box and arranging cables in a neat and easy-to-find scheme.

Leave the electrical box management to Cable Manager and enjoy neat installation every time.

This module has 7 terminals and is a necessary side solution for the BUS protocol.
