

Your Switch for  
an Easier Life

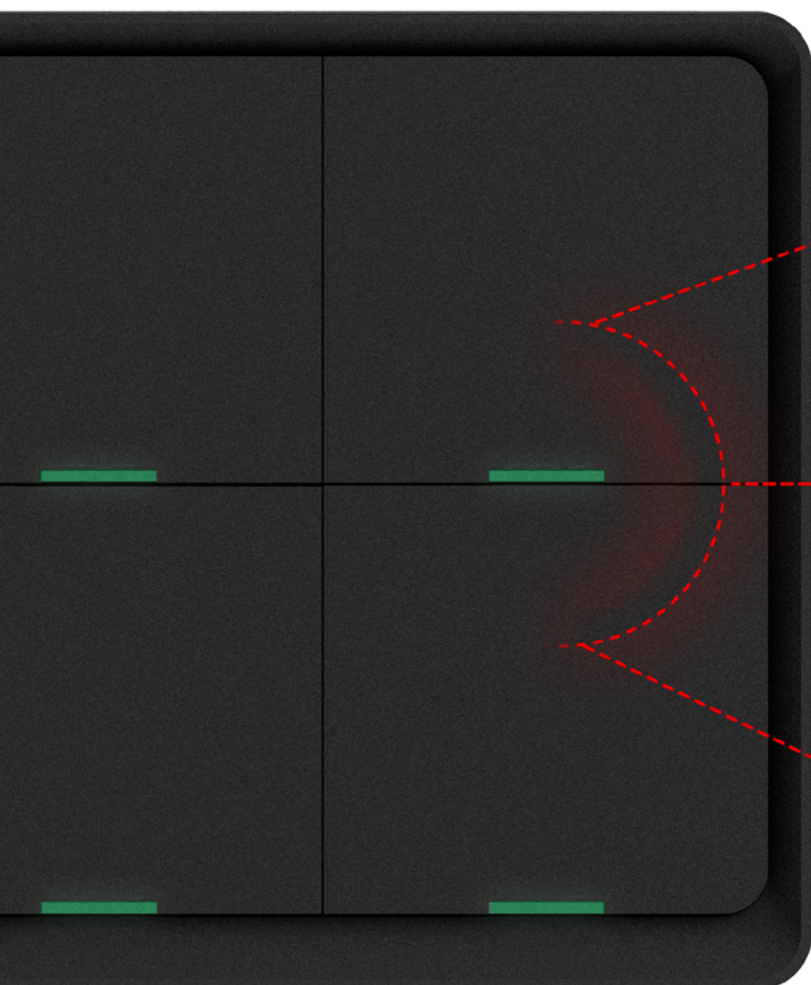

Smart home users are very familiar with the diverse wall switches this company produces. The 4-Gang Dione Switch from the newly manufactured Dione series can be considered the flower of the flock, as it offers more control capabilities than ever before.

The intuitive design of this switch makes it suitable for classic technology lovers. It features 4 user-friendly buttons for convenient and smooth control over lights.

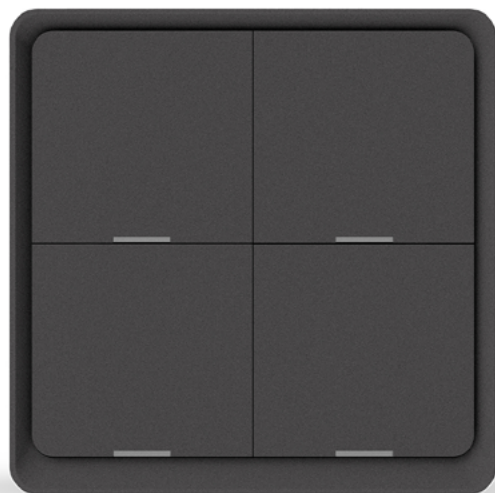

Our 4G Dione scene wall remote is here to help with basic ON/OFF lighting control and scene settings. That's right! Add it to your smart hub, and perform preset smart scenes. In fall, when days are short and it gets dark soon, you can turn on groups of lights using your smartphone.

Easy installation, a simple navigation route, and the maintenance-free use of this switch make it perfect for many different spaces, including bedrooms, balconies, reading rooms, kitchens, etc. So, next time you plan to watch a movie in your cozy spot on the balcony, just make sure you have the 4G Dione Switch installed nearby.

Some things just make life more fun.  
The 4-gang Dione Switch is one of them.
