

TIS HVAC VAV CONTROLLER

Data Sheet Rev 3.2

Model: HVAC6-3A-T

OVERVIEW

This module has 6 relays to control multiple fan speeds (low, medium, high), cooling, heating, and auxiliary contact. the auxiliary contact can be configured for both a dehumidifier and/or second heating/cooling pump.

The HVAC Module is also equipped with an external temperature sensor that helps when it's working with other wall thermostats. It can function as a stand-alone room heating calculator as well (it shows the average temperature in a room). This means that the HVAC Module installed in any room can be linked to the other room thermostat. As the result, both rooms are warmed based on their scale, and no one is overheated.
