

SATURN S7

The Cream of the Crop for Every Taste

TIS
CONTROL EVERYTHING

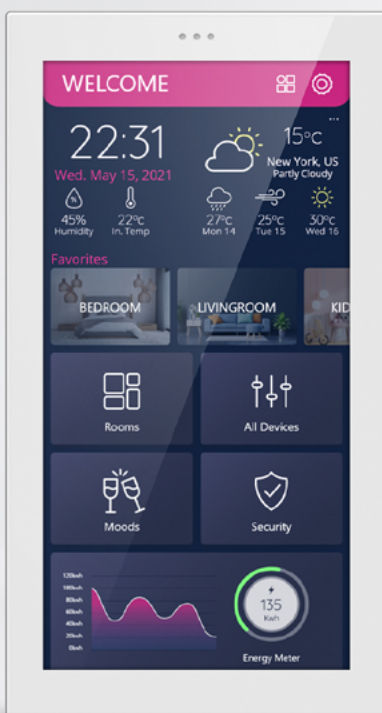

Smart home solutions are designed to both cover your smart needs and blend into your home's interior. You can mount TIS control panels anywhere around the house and be certain that they will sparkle on the wall. The Saturn 5.7 is a new control panel manufactured by TIS that gives you the velvety tech-enriched vibe you expect from a smart device.

The Saturn 5.7 is an elegant touch-sensitive interface with a sleek and customizable design that also features a central dashboard for your smart home settings.

Always ready to operate your commands, the Saturn 5.7 senses your presence and wakes up as you approach it so that it's ready for you to set lights, AC, music, curtain, scenes, security, and more.

With a few touches of your fingertips, you are all set to create a romantic evening for your wedding anniversary.

Dim the living room light to a purple shade, play a piece of favorite music, and let your smart home make a toast to your love.

Think of your Saturn panel like a mini-computer on the wall that allows you to see music albums, the weather forecast, and a list of the lights and curtains all around your house on a high-resolution screen.

The features of this control panel are accessible on your smartphone or tablet. You just need to add the Saturn 57 to your TIS hub so that you can activate, create, or change smart settings without moving an inch.

Whether you are in the hallway, your child's bedroom, in bed, at the office, or in the car heading to spend your weekend with your grandparents, you can be certain that Saturn 57 takes care of automatic commands around the room with presets and schedules.

This device comes with high-quality glass and frames, contributing flawlessly to your interior scheme. After all, nothing is more delightful than being able to conveniently create beautiful moments with a beautiful piece of equipment.

We are here to help you live peacefully and comfortably with the Saturn 57.
